

# Wind Direction

Model: WD740i

WD740i wind direction sensor with suitable mechanic and aluminum body. The output is gray code and RS232. It has a sensor for activating the body heater on cold season.

## Applications

- Wind monitoring
- Meteorology
- Wind Profiling
- Research for crop
- Pollution Control
- Ecology
- Wind measurement network

## Features

- High accuracy, resolution and reliability
- Long operating life
- bearings with low friction

Specification	
Protection IP	IP65
Operation temperature	-20 to +70
Operating range	0 to 360 D
Output	Digital(Gray code) RS232 RS485
Power supply	35mA at 12V For heater 150mA at 12VDC
